PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with academic and internship exposure to web development, Python programming, IoT using Arduino, and VLSI physical design. Interested in building practical software projects, strengthening technical skills, and growing as a software engineer.

TECHNICAL SKILLS

Web Development: Full-stack web development fundamentals • **Programming:** Python (basic), JavaScript • **Electronics:** VLSI design and physical design • **IoT:** Arduino

INTERNSHIP EXPERIENCE

Mainflow Service and Technologies Pvt. Ltd. — Web Development Intern **2 months**

Internship experience in web development.

OctaNet Services Pvt. Ltd. — Python Programming Intern **2 months**

Internship experience in Python programming.

CodTech IT Solutions — VLSI Design / Physical Design Intern **2 months**

Internship experience in VLSI design and physical-design concepts.

ACADEMIC PROJECTS

Energy-Efficient Wireless Sensor Network using Ant Colony Optimization (ACO) **Jan 2025 – Apr 2025**

B.Tech major project focused on node coverage and routing in a Wireless Sensor Network. The project objective was to reduce energy consumption, balance network load, and extend network lifetime using ACO-based optimization.

IoT-Based Home Automation **Sep 2024 – Nov 2024**

Developed a home-automation concept for controlling lights and fans remotely using a mobile phone.

EDUCATION

Bachelor of Technology — Sreenivasa Institute of Technology and Management Studies **2021 – 2025**

Electronics and Communication Engineering.

Intermediate — Narayana Junior College **2019 – 2021**

SSC — S.V.S.N. Siddhartha High School **2018 – 2019**

ACHIEVEMENTS & ADDITIONAL INFORMATION

• Participated in the TCS NQT Cognitive assessment and secured 56%.
• Attended seminars and workshops on electronics, high-speed switching and routing, and trends in 5G communication.
Languages: English, Telugu • **Interests:** Reading, goal setting, and continuous learning
